ACP GAMING LIMITED

DAD & DAD Central System Plus

20. Best IR or Supplier Innovation Nomination

Hayden Lei – Finance Director
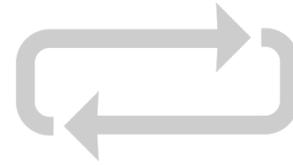

DAD: Key Features

Our Innovation: While the development window was tight, our engineers didn't just meet standards—they redefined them. We pioneered the only Display Audit Device on the market that creatively integrates a built-in splitter, dual 4K UHD input/output, and simultaneous dual-screen capture into a single, elegant unit.

4K Resolution Support

Support Two Videos Streaming

HDMI and DP Port Video Loop (Instead of Splitter)

Each Video Channel Has 3x Individual Settings
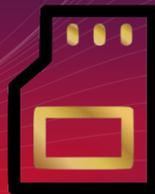

Video Channel Live Time Preview

User Access Right Control

DAD: Key Features

Our Innovation: This unparalleled hardware innovation is powered by a backend system equally visionary. Ours is the industry's only platform designed not to create silos, but to build bridges. With universal compatibility across all DAD brands, we provide a single, cohesive command center that unifies IR's entire floor's data, future-proofing the investment and simplifying operations from day one.

Support Editable OSD overlay Text x4
