ANGEL Smart Table System adopts a **"Hybrid" AI** (artificial intelligence) and **RFID (Radio-Frequency Identification) solution** that precisely tracks the quantity, type, and positioning of chips on the gaming table while digitizing all data in real time.

ANGEL "Hybrid" Smart Table System is a revolutionary product. It not only is **easy and beneficial to use**, it doesn't even need you to change your operation procedures to suit it. Casino patrons wont even notice it! And most importantly, it **doesn't hinder Casino's operation by limiting game table layout**, and game layouts can be installed without hassles!

In addition to the prevention of human error, fraud detection counterfeit chips circulation, **ANGEL "Hybrid" Smart Table System** enhances casino's operations and efficiency including marketing strategies, real time data analysis, dealer's performance and supporting optimal game management. It **provides a clear window for operations executives and management to peer deeper into their operations and devise solution or creativity.**

Also, **ANGEL "Hybrid" Smart Table System** is highly modular and can be implemented according to casino's needs and budget.

Last but not least, our history, dedication & expertise have helped us to develop this "Smart" system across to other table games such as Blackjack, Roulette and Sic Bo. **We are here to stay, to support & to innovate!**
