

# V8

## A new standard in ETGs

Alfastreet's V8 is a dynamic solution designed to fundamentally enhance any casino floor. The V8 seamlessly integrates cutting-edge technology with a focus on both operator profitability and an unparalleled player experience.

### Unmatched Versatility and Customization

The V8's core strength is its innovative modular design. This future-proof feature allows casinos to effortlessly expand the eight-player configuration with additional stations, enabling it to grow seamlessly with your business.

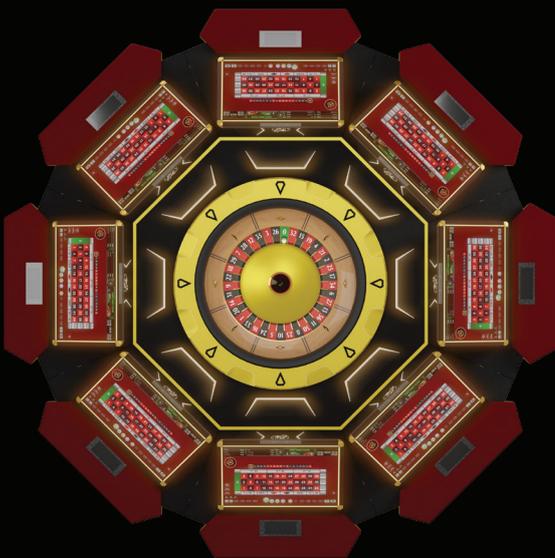

The exclusive **Alfastreet Architecture** further empowers operators to create a customized and cohesive gaming environment. We collaborate to tailor every detail, from various cabinet styles and colour schemes to bespoke customizations like illuminated wheels and personalized keypads, to match your casino's unique vision and aesthetic.

### An Immersive Player Experience

The V8 is engineered to captivate and retain players. It creates an inviting atmosphere through customizable lighting and sound effects that are synchronized with gameplay.

The multi-game interface is a powerful feature that provides access to a wide selection of games. This versatility caters to diverse player preferences and keeps them engaged for longer periods. Additionally, a built-in tournament option is available to foster a social and competitive atmosphere, driving player engagement.

### The Winning Proposition

The Alfastreet V8 stands out as the best ETG on the market because it is a complete, holistic solution that delivers on both form and function. Its unique blend of modularity, bespoke customization, and immersive player features makes it a powerful and strategic asset for any casino.
