

I'm sincerely grateful for the nomination. This recognition reflects the guidance of mentors, the support of colleagues, and the trust of partners I've had the privilege to work with. My path has woven through operations, project management, and compliance.

Since 2006, I have built a progressive career in slot operations, beginning as a slot attendant and steadily expanding my responsibilities across the casino floor. Over the years, I developed deep, hands-on expertise in machine performance, guest experience, and operational workflows. Last year, I transitioned into a specialized role focused on projects and compliance, where I oversee end-to-end delivery of slot-related initiatives across Wynn Macau and Wynn palace.

My current scope covers venue layout design, game selection and configuration, and cross-functional coordination to ensure timely, high-quality deployments. I collaborate closely with operations, marketing, casino administration teams to align game portfolios with commercial objectives and player preferences.

On the regulatory side, I manage communications with regulatory authorities, prepare and submit applications, and ensure all products and processes meet jurisdictional standards from testing through launch. This includes interpreting regulatory requirements, maintaining documentation, and implementing controls to support ongoing compliance.

I also analyze performance data to optimize machine mix, denomination strategies, and floor placement. My background uniquely positions me to bridge frontline operations with structured project governance, ensuring that new games and configurations are introduced efficiently, safely, and in full alignment with regulatory expectations.

This nomination is an encouragement to me to keep doing the work well and inspires me to keep improving.
