"We see more than you think"

AXPRO provides AI-driven <u>video recording</u> and <u>real-time rewards</u> in one unified system - "built to catch what others miss, and act before it's too late."

Intelligent Bonus (iBonus)

is a new bonus system designed by operators, not machine manufacturers.

iBonus is a next-generation bonus system that analyzes symbols, bet amounts, and win values without SAS communication, using video extracted from slot machine screens. With AI-powered precision operating at 0.06-second intervals, it evaluates symbol-based bonus conditions through pre-trained algorithms. When the conditions are met, the bonus is triggered through an RNG to ensure fairness.

Unlike traditional systems, iBonus allows operators to directly configure bonus symbols, trigger conditions, machine targets, and accumulation logic - enabling a flexible and strategy-driven bonus tailored to the casino's goals and marketing needs.

❑ KEY FEATURES OF AI SCATTER BONUS

- Symbol Analysis Based on AI Video Recognition
- Symbol-Based Bonus Triggering
- Operator-Centric Customization
- Flexible Integration with Existing Systems
