

ENTERTAINMENT EXPLOSION

IGT's Rising Rockets is a high-performing multi-level link progressive video slots game series with two entertaining base games, Emperor and Empress, that offer three lock and respin bonuses.

With 300+ installations throughout Asia over the past 9 months, Rising Rockets has consistently performed above floor average on main gaming floors across the region, delivering entertainment and excitement to the players.

Rising Rockets offers operators flexibility with a variety of jackpot start-up options to cater for all types of gaming floors and player types. From “life changing” jackpots to fast-rapid hit jackpots that focus on different hit frequencies, Rising Rockets delivers variety and choice.

Providing something for every player-type thanks to its different and entertaining gameplay features, Rising Rockets offers a selection of denomination options and the exciting link and standalone jackpot opportunities. Players and operators alike are enjoying the entertainment and performance of Rising Rockets.

Rising Rockets Link is an 88-credit cost-to-cover 50-line game series offering one link progressive jackpot, one standalone progressive jackpot and two scalable bonus prize levels with the feature frequency on average being less than 60 spins

Something that differentiates Rising rockets, making it unique from other products available in Asia, is that there is no Free Games Feature in the game family. Rather the focus is on three unique Rocket features.

The three lock and respin bonuses take the gameplay experience to the next level, during this feature:

- Big Bang - determines the number of playable bonus windows - with the opportunity to land 2, 3 or 4 game play windows
- Spin Boost – increases the number of respins to 4 and Treasure Chests offer the chance for bigger prizes
- Prize Boost – at the end of every spin there is an opportunity to boost credits and land x2, x3 x4, x5, x10 or x25 multipliers

Due to the different feature combinations, up to seven different combinations are possible with up to three active bonuses, that keep players guessing on what the next feature may be.

This explosive series is available on IGT's PeakSlant49™, PeakCurve49™ & CrystalCurve® cabinets, which offer ultra-high-definition screens for an immersive player experience.
