

paltronicsJCS

jackpot control suite

PaltronicsJCS Jackpot Control Suite

- Ethernet communications from EGM to JCS Server means faster and more reliable floor network.
- Server hardware platform independent; can be virtualised or use physical servers.
- Easily incorporated into existing IT infrastructure.
- Operates with all existing EGMs on your floor.
- Ability to operate multiple levels and multiple links on each EGM.
- Stand-Alone Venue and Wide Area (Multi-Venue) capable.
- Automated discovery of EGMs.
- Ease of installation.
- Multi protocols – SAS, ASP and X series.
- Remote support available via VPN back to Paltronics.
- Well documented IT infrastructure requirements.
- Full Hardware and Software redundancy capable.
- Enhanced diagnostics capabilities.
- Internally and independently quality certified.
- Certified for Gli-12

PaltronicsJCS Features & Benefits

- Ease of use and configuration of gaming floor**
 EGM Auto-discovery using ethernet communications ensures increased speed and stability of communications.
- Downloadable firmware to interface cards**
 For software upgrades and modifications, each individual card can be updated via the server.
- Pre-configure link changes days and weeks in advance**
 Pre-configured changes ensure minimal downtime.
- Real-time monitoring of your gaming floor**
 Immediate notification of jackpot hits, player usage or if an EGM goes down.
- Provides a secure, powerful and easy to use means for configuring and monitoring links on the gaming floor**
 Link configurations completed from a central location in minutes, including attachments and detachments, parameter changes, automatic dispersal calculations and application.
- Ability to connect to an unlimited number of EGMs**
 PaltronicsJCS Scalability ensures you can connect additional EGMs and jackpots as required.
- Built in redundancy**
 High availability and reliability assured through highly stable and redundant component system.
- High security**
 Limit access through allocated permission levels. Full access auditing determined by you.
- Link multiple venue sites**
 Manage and monitor links in remote sites from the central site, enables link configuration, jackpot hit views and multi-site central reporting.
